**SPEED POST**

B-29016/04/05/IPC-I/

August 28, 2018

To

The Regional Director  
Central Pollution Control Board  
"TUM-SIR", Lower Motinagar,  
Near Fire Brigade H.Q.,  
Shillong -793014

**Sub: Re-inspection of M/s Brahmaputra Cracker and Polymer Limited,  
Dibrugarh, Assam -reg.**

Sir,

With reference to the inspection based on SMS alerts by Regional Director, Shillong on June 15, 2018. A show cause notice dated July 25, 2018 was issued to the Unit. The Unit was responded vide letter dated 23.08.2018 that the compliance has been achieved.

You are, therefore, requested to conduct a re-inspection of the Unit and submit the report on the compliance status of the Unit. The inspection report may please be forwarded to this office by September 15, 2018.

Encl: as above

Yours faithfully,

(Gurnam Singh)  
Addl. Director & I/c IPC-I

**Sub: Directions under Section 5 of the Environment (Protection) Act, 1986 – Notice thereof.**

Dear Sir,

This has reference to your letter no. B-29016 / 04 /06 /IPC-I dated 25<sup>th</sup> July 2018 on the subject. Please find below our point wise submission in seriatim:

**1. The unit shall obtain a valid CCA under Air Act, Water Act and Hazardous Waste authorization from PCB, Assam**

'Consent to Operate' for our unit for 2018-19 and valid up to 31.03.2019 was received from Pollution Control Board, Assam on 06.08.2018. Copy of the same is attached as **Annexure-I** for your ready reference.

Application of Hazardous Waste Management Authorization was submitted to PCB, Assam on 23.01.2017. Further, as per advice of PCB, Assam, it was again applied online on 04.08.2018 (online application attached as **Annexure-II**). We are continuously following up with PCB, Assam for issuing us the Hazardous Waste Management Authorization at the earliest.

**2. The Unit shall upgrade / maintain the effluent treatment plant (ETP) so that discharged effluent may be conformed to prescribed standard.**

The existing ETP plant of BCPL, designed with advanced technology, is capable of maintaining all the parameters of the treated effluent well within MINAS standards for Petrochemical Plant as well as standards mentioned in 'Consent to Operate' of PCB Assam. The modern state of art technology includes SBR (Sequential batch reactor) which reduces COD of the effluent from 1200 PPM to 80 PPM.

The treated effluent quality is monitored continuously and is analyzed on a daily basis in the NABL accredited BCPL Laboratory to ensure that all the parameters are well within prescribed limits. As per CPCB guidelines, online monitoring system is also available in our plant to monitor treated effluent quality on real time basis which is also connected with CPCB, New Delhi server.
