Sub: Follow up of weekly review meetings- Joint visits of CPCB and concerned SPCBs and concerned RDs to participate in sampling and analysis of Ganga River at 94 locations, Design the facility for uploading the photographs and Reviewing water quality monitoring locations where sewage outfalls are reported, (Fixing proper sampling locations)

Sir,

As you are aware water quality monitoring of river Ganga is carried out at 94 locations through concerned SPCBs. During the weekly review meeting, it has been decided that there shall be joint visit of CPCB and SPCBs for sampling and analysis of Ganga River at 94 identified locations under National Water Quality Monitoring Programme. A list of monitoring locations (**Annexure-I**) is enclosed for ready reference and to plan joint monitoring with SPCB by concerned RDs.

The visiting team shall take the photographs of the monitoring locations on river for visual characterization. During the visit, information may be gathered on the sewage outfalls, industrial effluent outfalls and drains in the upstream and downstream of monitoring locations for reviewing the sites.

In case the siting of monitoring location is not proper, alternate suitable ultimate site in the vicinity may be identified. The details of joint visit for each location to be submitted to a facility for repository purpose. The facility for uploading the site visit report and photographs shall be designed by IT division. It is suggested that the joint visit is completed within three months and reports be submitted to CPCB (HO) to enable to take further action on the matter.

Yours faithfully,

**(A. Sudhakar)
Member Secretary**

Encl: As above
